🎓 EDUCATION

Bachelor   2022 – present
National Polytechnic University of Armenia   Yerevan, Armenia

Student   2015 – 2020
Tumo   Gyumri, Armenia

🧠 SKILLS

Java

Skilled in Java Core and Spring Boot. Developed a backend application from scratch using REST APIs, Liquibase for database migrations, and tests. Experienced in API development and system integrations. Regularly monitor applications using Grafana and actively troubleshoot by inspecting logs directly inside Kubernetes pods, consistently ensuring the health and reliability of my projects. Utilized OpenAPI for clear and maintainable integrations.

PostgreSQL

Experienced in using PostgreSQL for backend development, including writing complex SQL queries, designing schemas, and managing data. Integrated PostgreSQL with Java Spring Boot applications and used it in combination with Liquibase for versioned migrations.

CI/CD

Created CI/CD pipelines in GitLab for Java Spring Boot projects. Automated build, test, and deployment stages. Designed and used custom pipeline schemas to ensure reliable and maintainable delivery workflows.

Linux

Comfortable working with Linux command-line interfaces, including essential Bash scripting, and experienced in performing basic system administration tasks and troubleshooting common issues.

Git & GitLab

Use daily for version control and collaboration. Confident in all common operations and workflows.

💼 PROFESSIONAL EXPERIENCE

Tumo   05/2023 – 06/2024
Learning Coach

Mentored students in technology and programming, leading
workshops on web development and JavaScript. Helped young
talents build skills and explore creative tech projects.

BostonGene   08/2024 – 06/2025
Java Software Engineer

Worked on real-world projects starting with JavaScript, then
transitioned to Java development. Gained hands-on experience in
Core Java and Spring Boot, wrote migrations for healthcare
databases, implemented CI/CD pipelines, and contributed by
closing development tickets and building backend features.

📁 PROJECTS

Java Project

PowerFind is a demo backend project where I showcase various skills in Java development,
including clean architecture, database integration, and RESTful API implementation using
Spring Boot. The project serves as a platform to highlight my technical abilities and
development practices. **link** ⧉

Portfolio

I'm creating a portfolio where I learn and document my projects in JavaScript. This is my
starting project, where I'm gaining knowledge in frontend development. **link** ⧉
